The Federal Aviation Administration has announced the release of their long pending interim rules for operation of model aircraft and drones. All operators of remotely piloted aircraft are required to register ONE TIME. You do NOT have to register each airplane. The Academy of Model Aeronautics has recommended that members register as required while they pursue legal action against this ruling. The latest information

from AMA is available on their website at: <http://amablog.modelaircraft.org/amagov/2016/01/11/update-uas-registration-frequently-asked-questions/> . This includes the correct website to contact the FAA for registration.
